

²**G**enomic Selection for
Ph Climate Adaptation in
The Capsule

AusPheno/Controlled Environment
2016

Justin Borevitz

Pre-breeding for Adaptation

Environment

Assist Natural Selection – Overcome non random migration && non random mating

Outline

Environmental Control & Phenotyping

Climate Simulation (Diurnal, Seasonal, Regional)

Research for field plants || breed plants for chamber

Optimize cost, resolution and throughput

Grow Capsule, Container, Facility

Phenomics Analytics

2,3,4,5D Point cloud, multispectral (hypercam)

Summary, Segmentation & Genetic Classification

Hyperspectral, thermal, fluorescence

Genomics

Mapping Collections (Brachy)

Association Studies (Brachy, Arabidopsis1001)

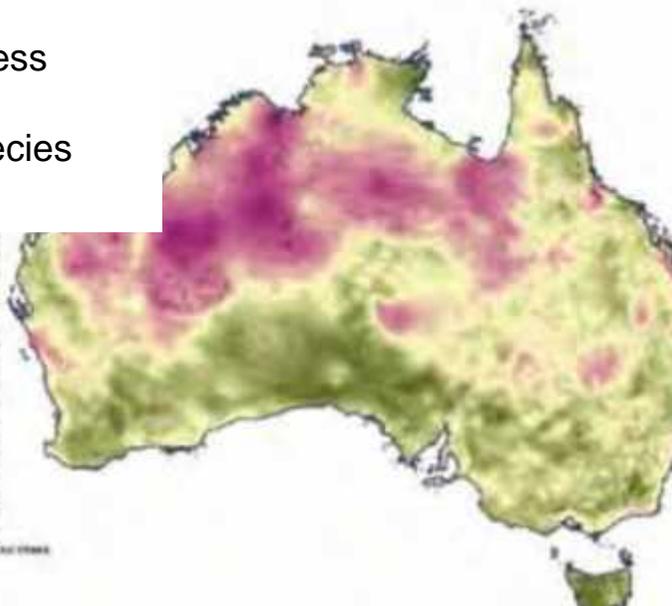

Model, Predict, Select, Adapt

Crop Models eg PhotoThermal Time & Genetic Models

Climate Change on Vegetation

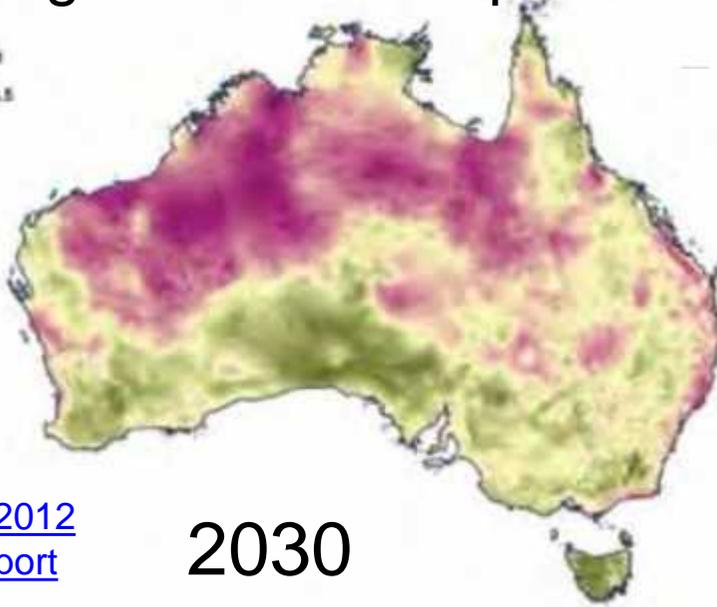

Biologically scaled
environmental stress
based on GDM of
vascular-plant species

Best
case

Assisted migration and adaptation

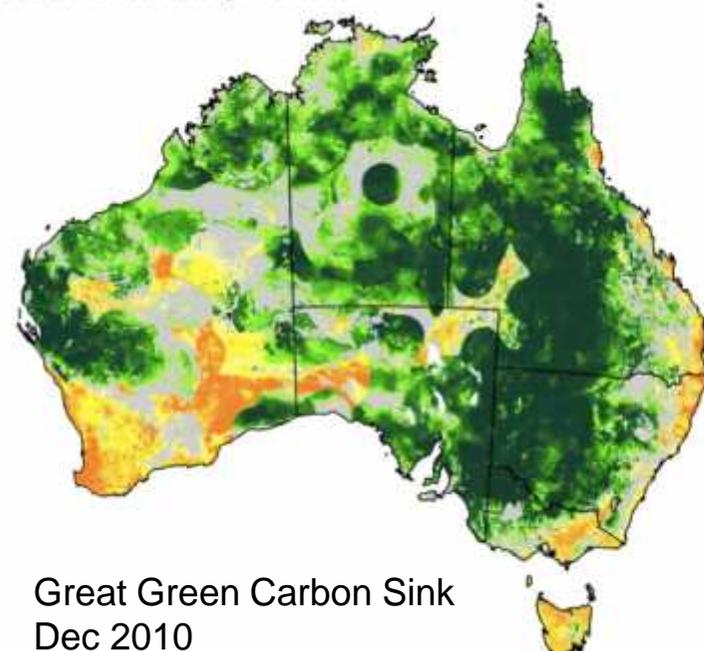

2030
High impact

CSIRO mk3.5

2070

Global Plant Energy System

Provide Food AND Environmental Security
Cultivated lands, Rangelands, Native Vegetation

Borevitzlab
Pogsonlab
Atkinlab
CoE PEB, IWYP, APPF

- Threatened by
 - genetic bottleneck
 - monocultures
 - Fragmentation, reduced geneflow
 - Climate Variability and Change
 - Depleting Resources (water, nutrients, soil)
- Need another **Green** Revolution
 - a transformation in Plant Breeding

URBAN FARMING future X-PRIZE

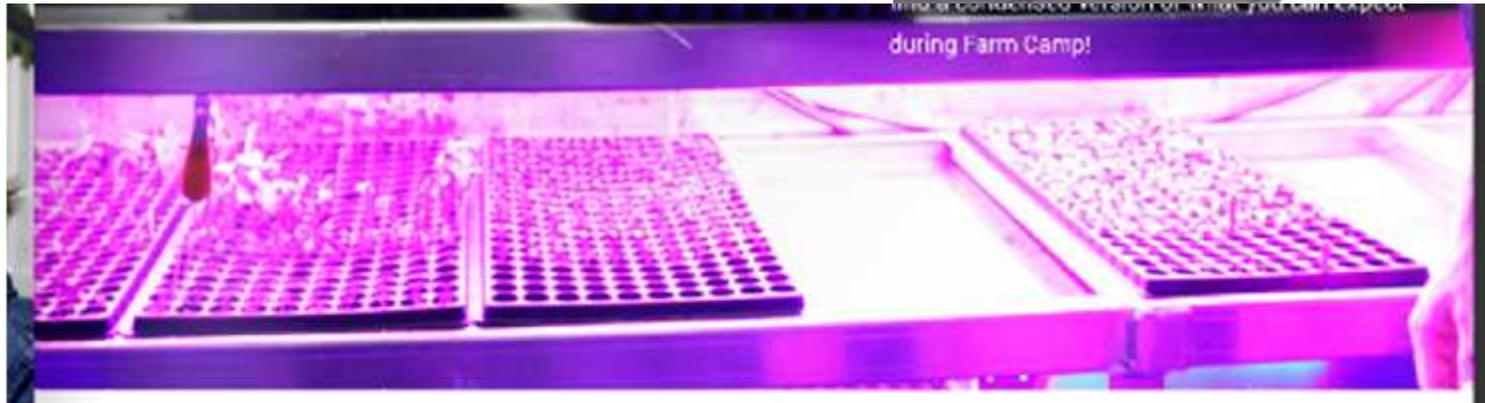

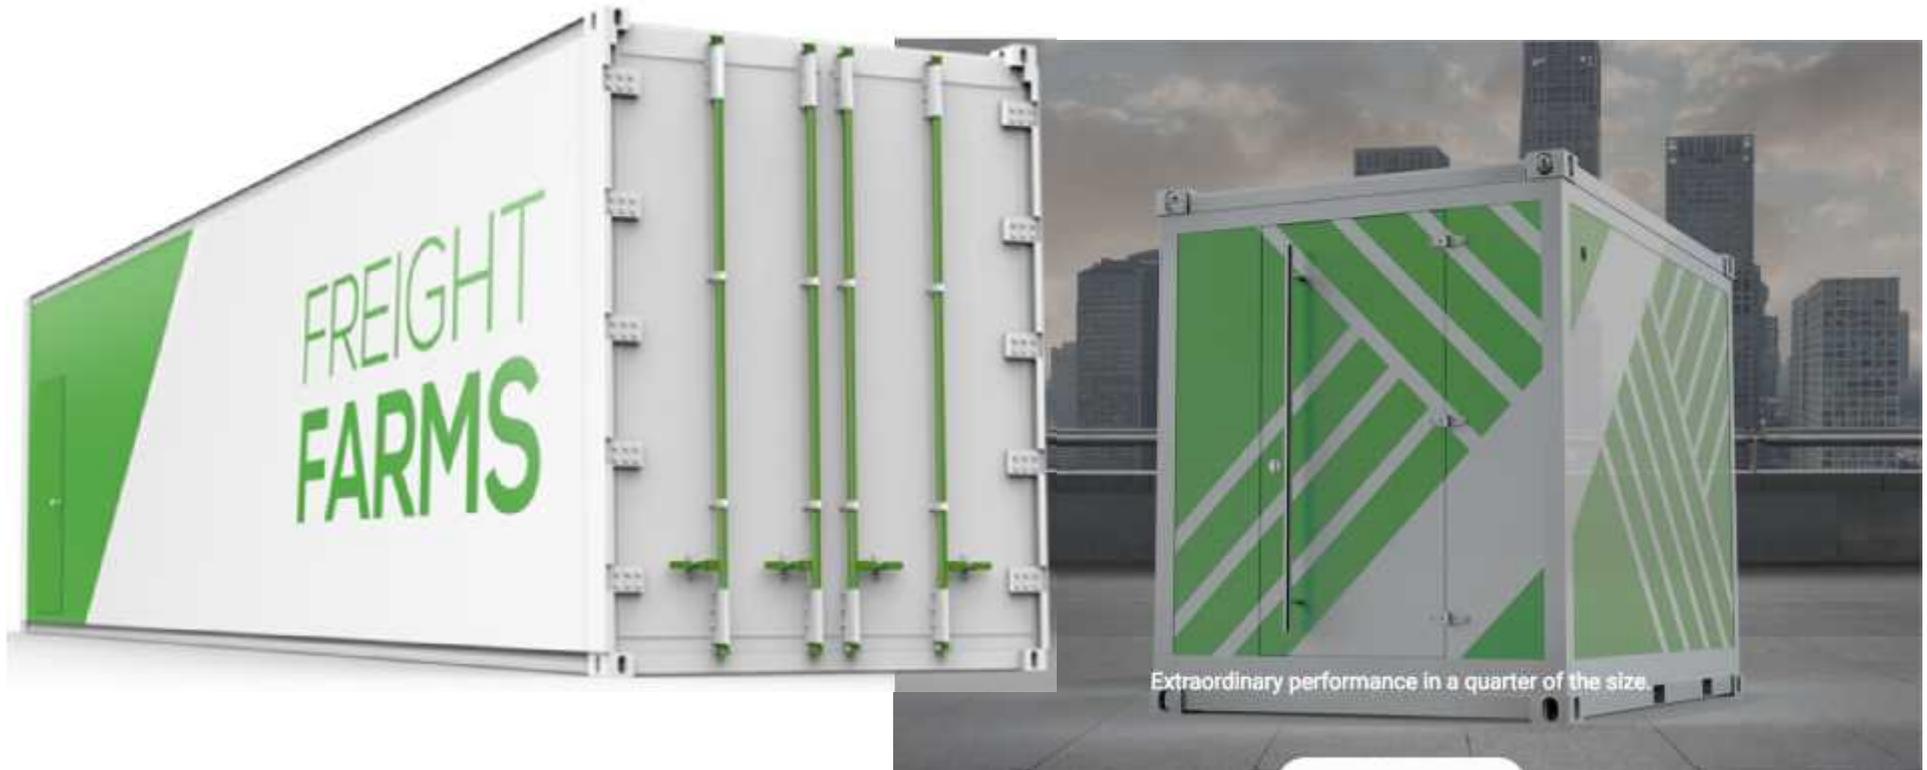

Spread (Japan) autofarm lettuce

30,000 heads per day! 4000m² or ~500 racks

Grow a Facility, Modular
And/or Distribute around

Introducing the
Ecos PowerCube®

Anytime, Anywhere Power.

Ecos PowerCube® is a patented, self-contained, self-sustaining, solar-powered generator that uses the power of the sun to provide energy, communications, and clean water to the most remote, off-grid locations. Protected by U.S. Patent No. 8,383,102.

Hydrofarm GLC00100

Eli Borevitz – future farmer

Amazon \$600

Run climate receipts

MIT food computer – breed for new environments

Control what you can and monitor for what you can't

Grow Capsule

PSI

Basic Grade
500uE at 1m
Temp 15-30C
Humidity 70-80%
Spring/Autumn

Scientific Grade
1500uE at 1m
Temp 4-40C
Humidity 30-90%
Summer/winter

Adjust R/FR ratio to simulate density

Correlation between Flowering Time and Seed Yield

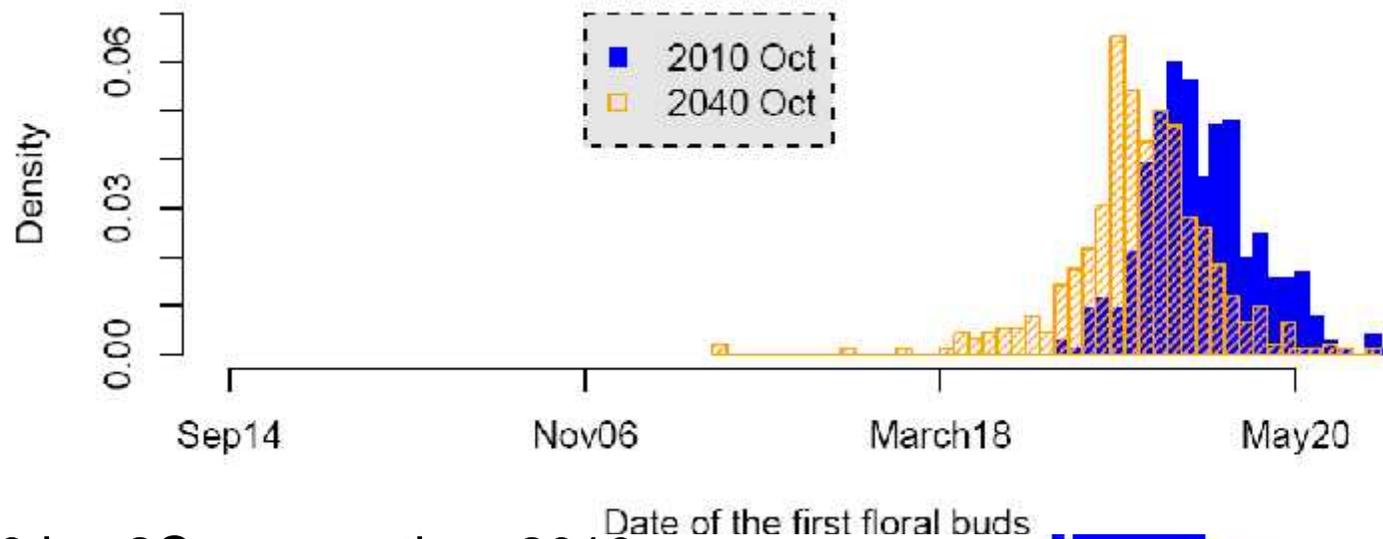

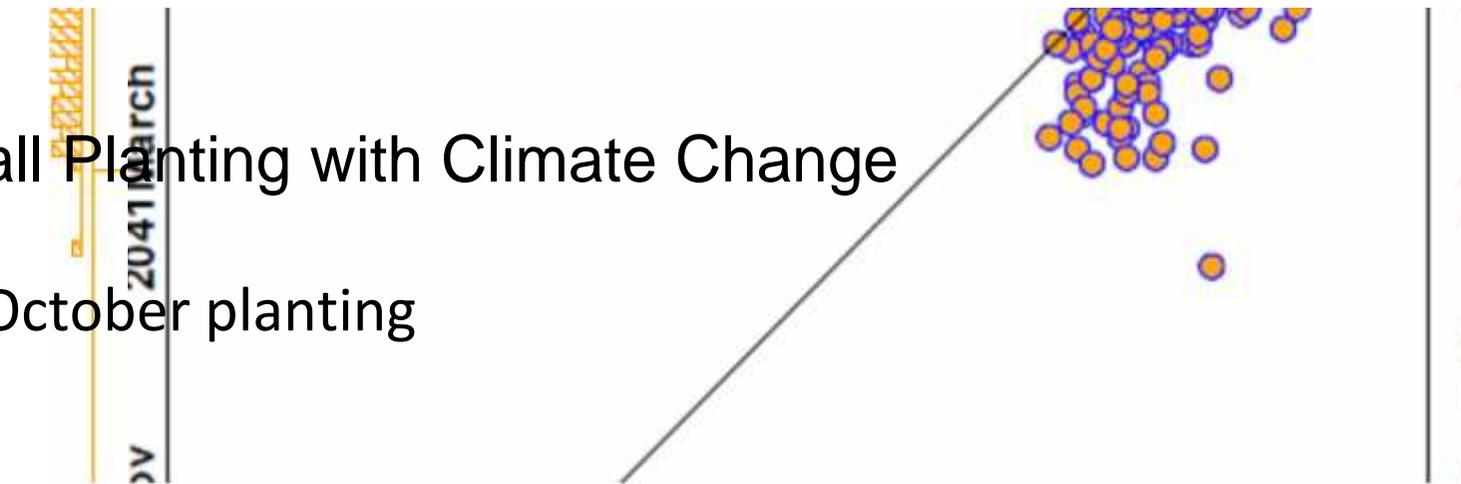

Black lines showed segmented regression with optimal breaking points.

Flowering Time and Fitness

Fall Planting with Climate Change

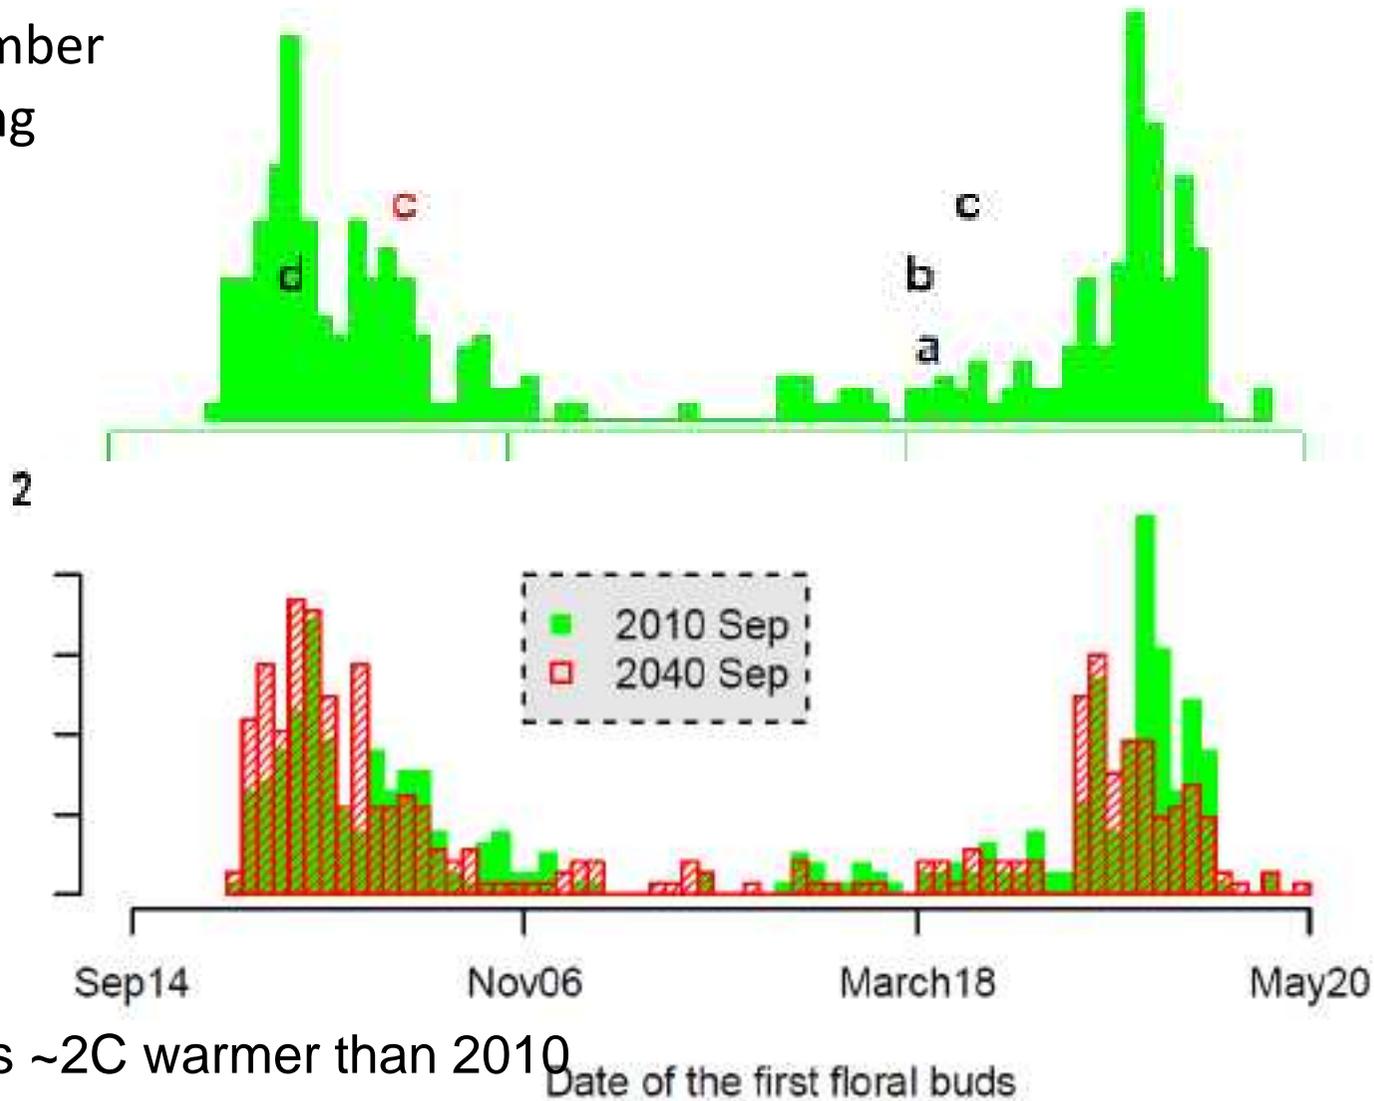

October planting

2040 is ~2C warmer than 2010

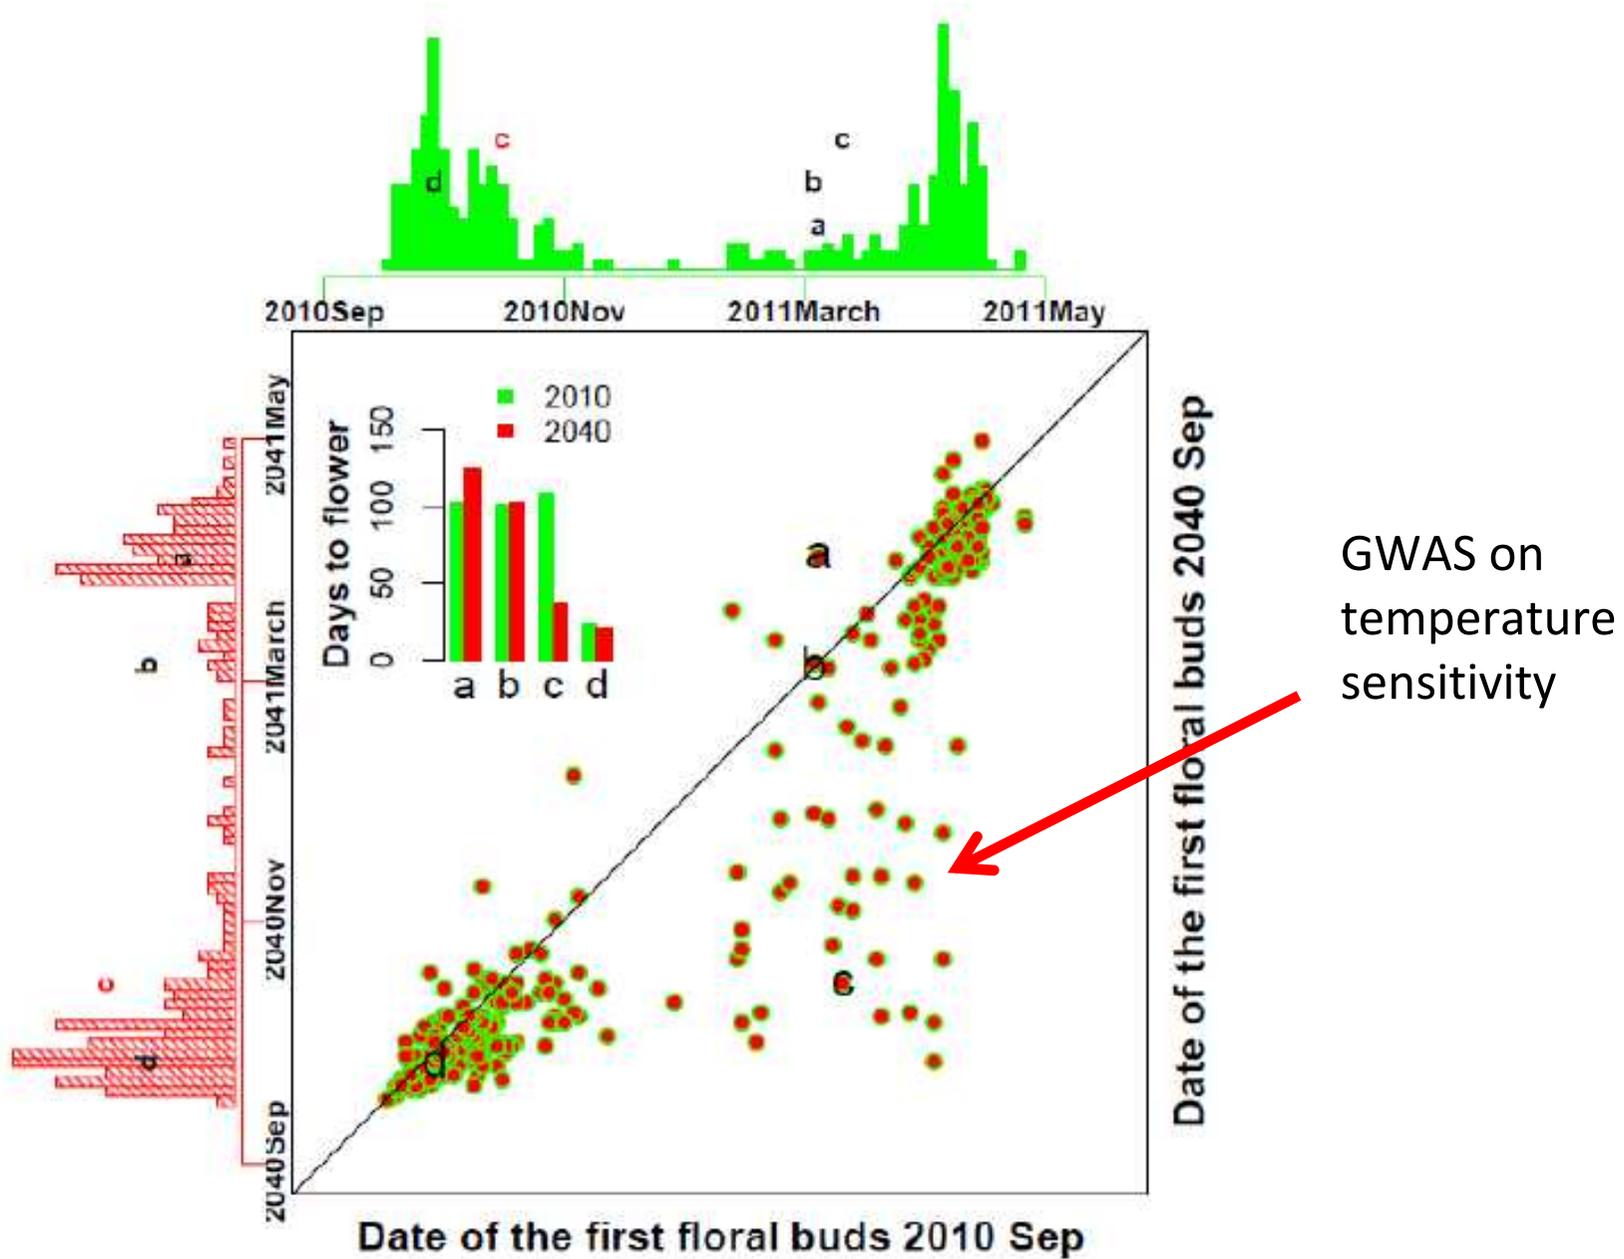

Fall Planting with Climate Change

September
Planting

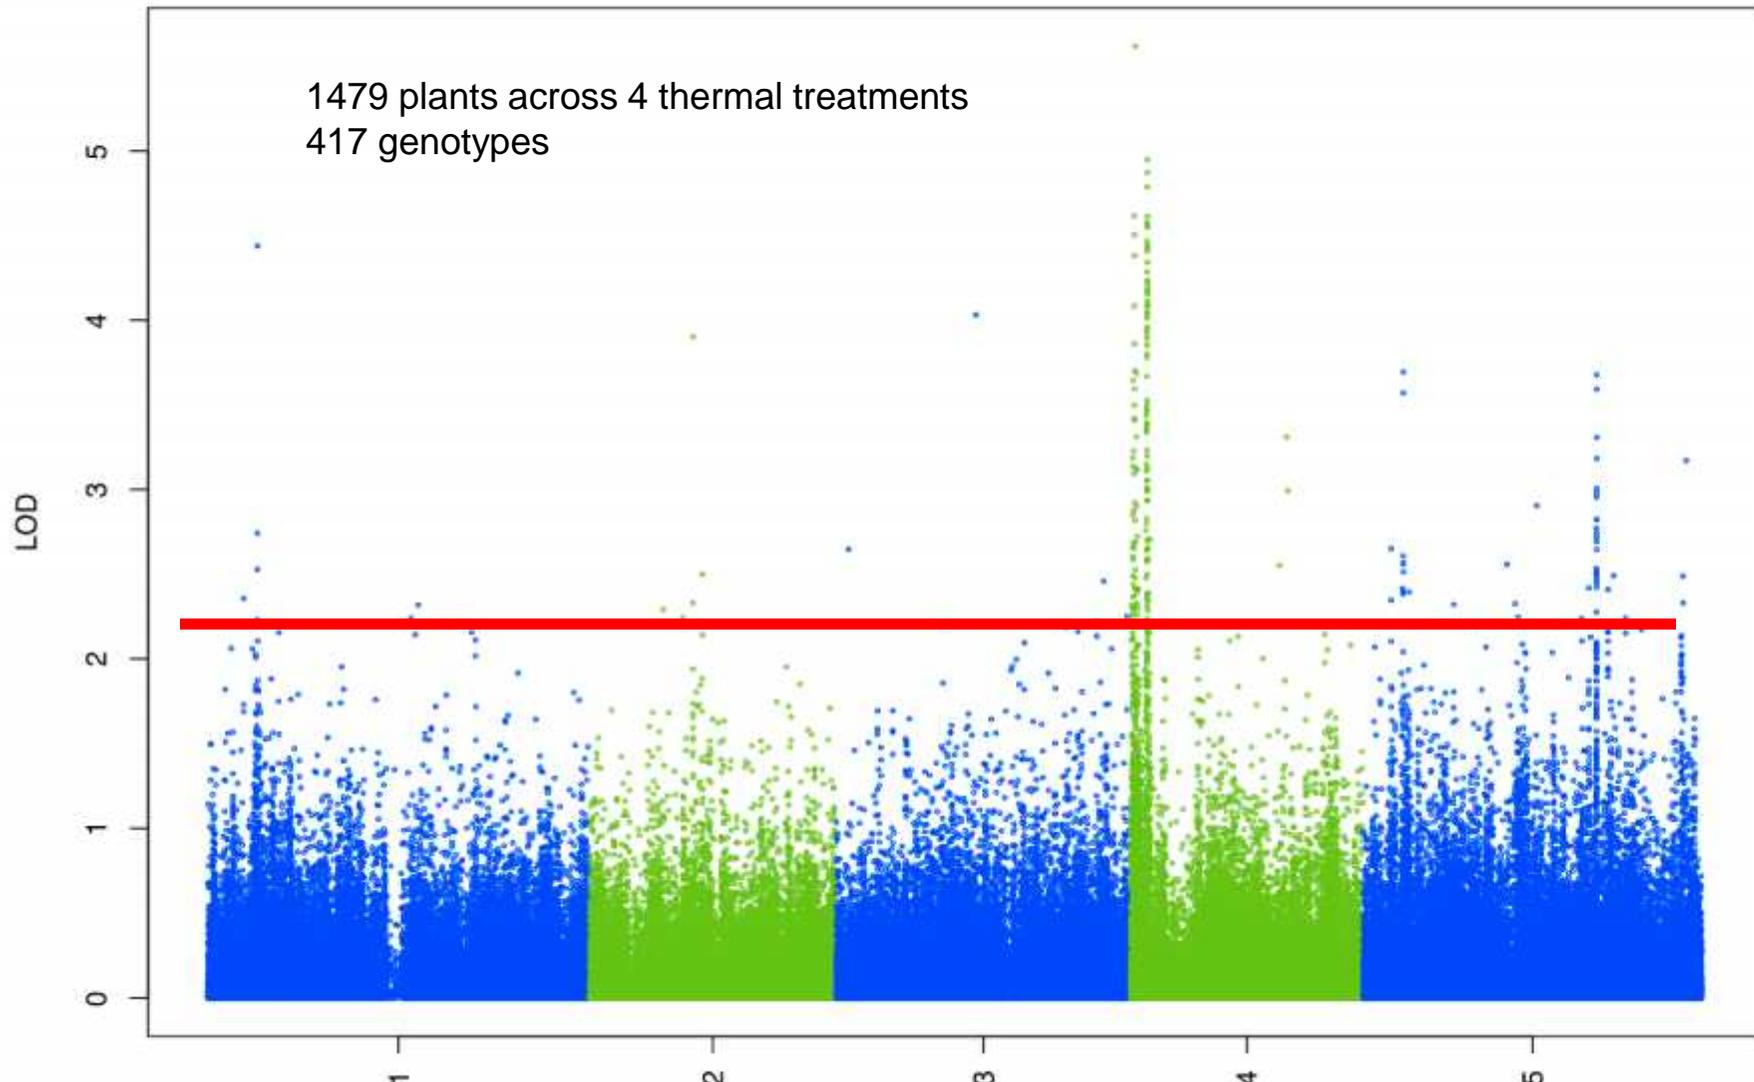

2040 is ~2C warmer than 2010

Early Fall Planting 2010 vs 2040

GWAS Flowering * Temperature

DTF (QTL)

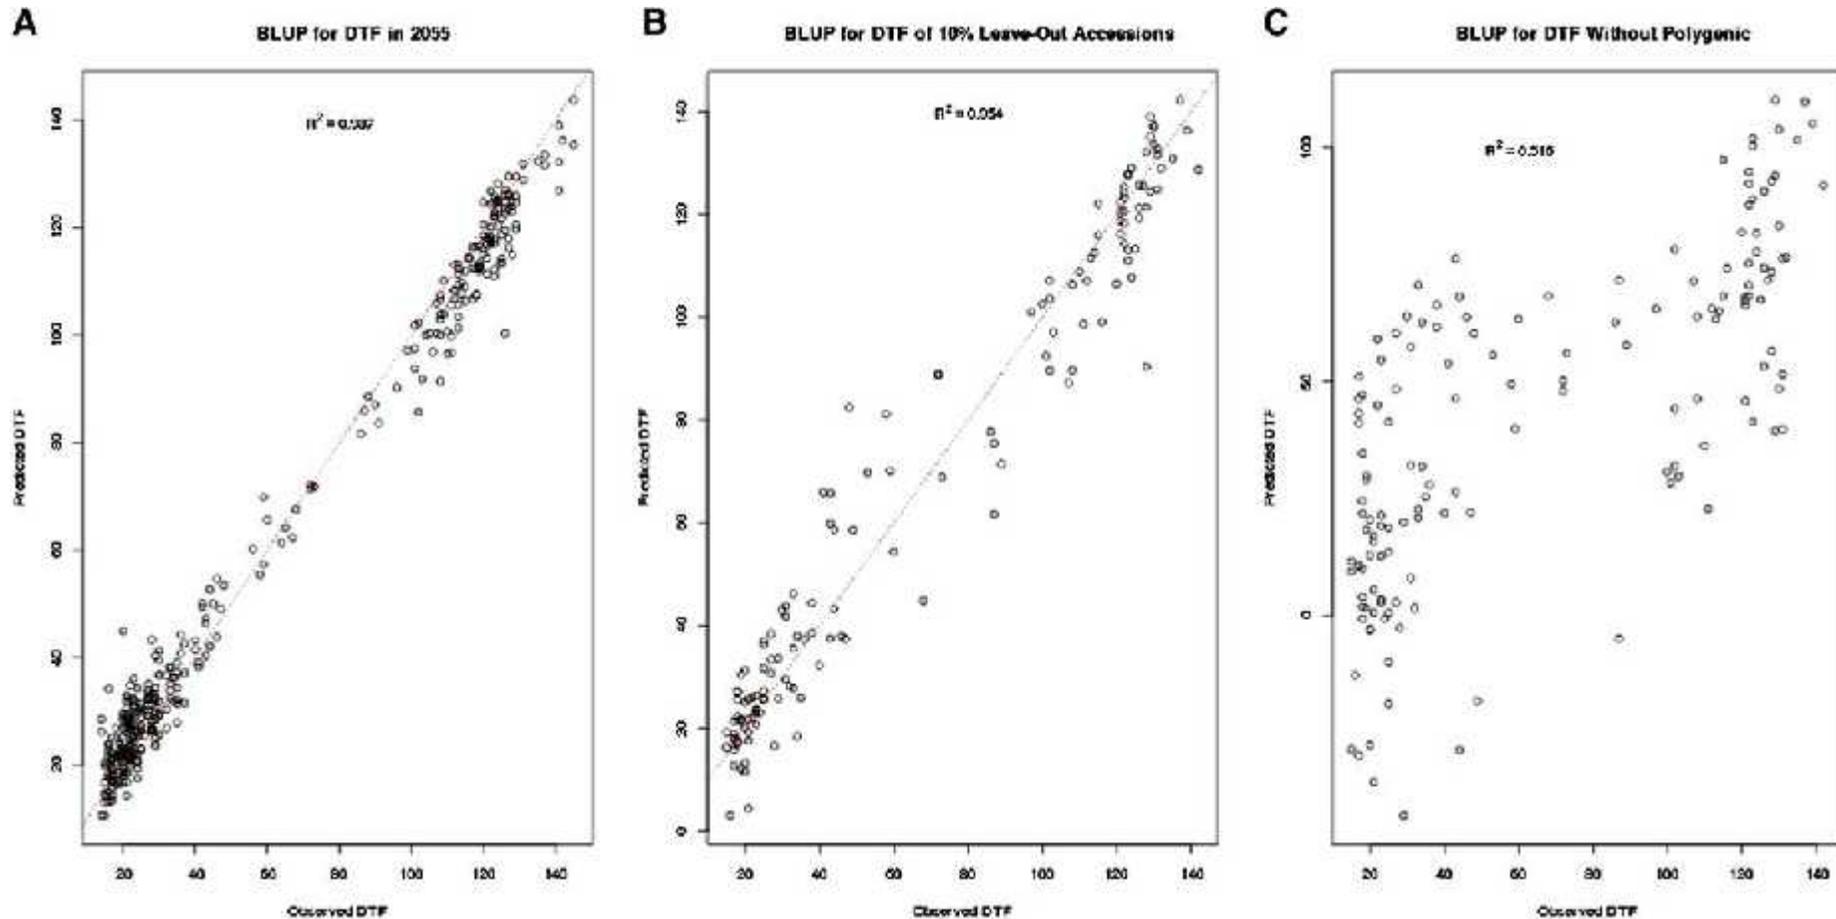

September Planting

GWAS using QTLRel, Riyan Cheng

5 FFT loci, 4 apriori loci, 5 GxE thermal sensitive flowering loci

Prediction of Future Flowering

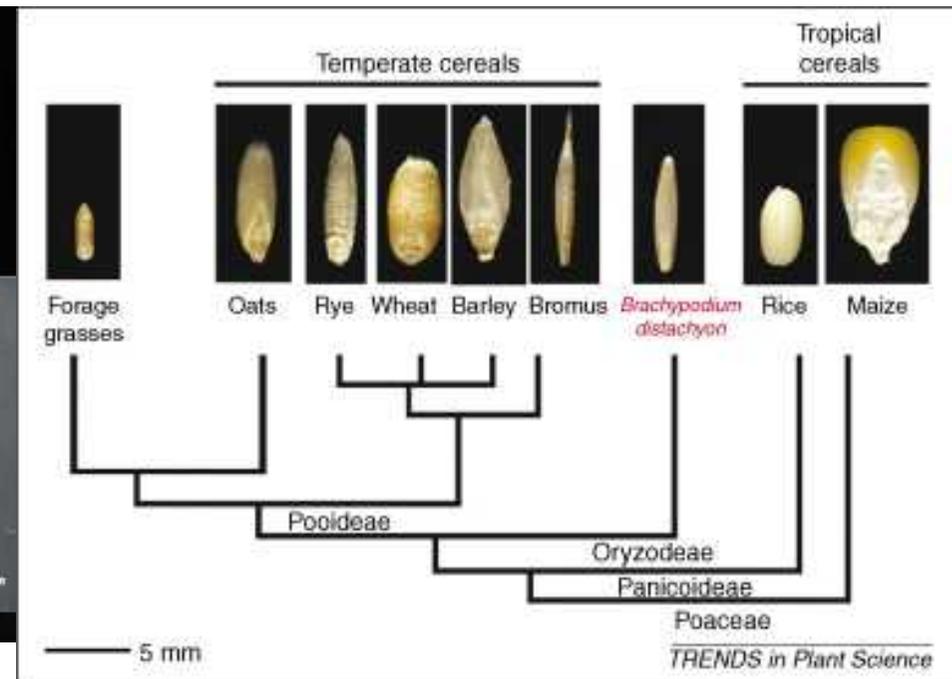

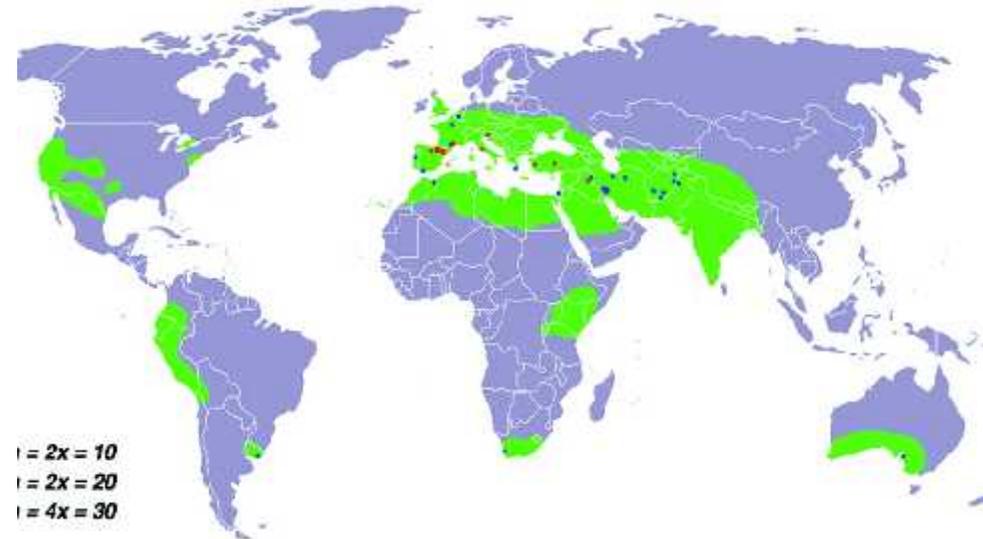

Predicted phenotype
Major QTL effects + polygeneic

Predicted phenotype
Major QTL effects alone

Brachypodium ssp

- Small grass
- 2 diploid species
- 1 tetraploid species
- Broad geographic
- Ecological range

Germplasm: 2,722 Accessions, 817 locations

350 USDA Public Global Accessions: Dave Garvin and John Vogel

120 Private Collection: Spanish lines, Luis Mur

130 Spanish Private: Accessions, Pilar Catalan

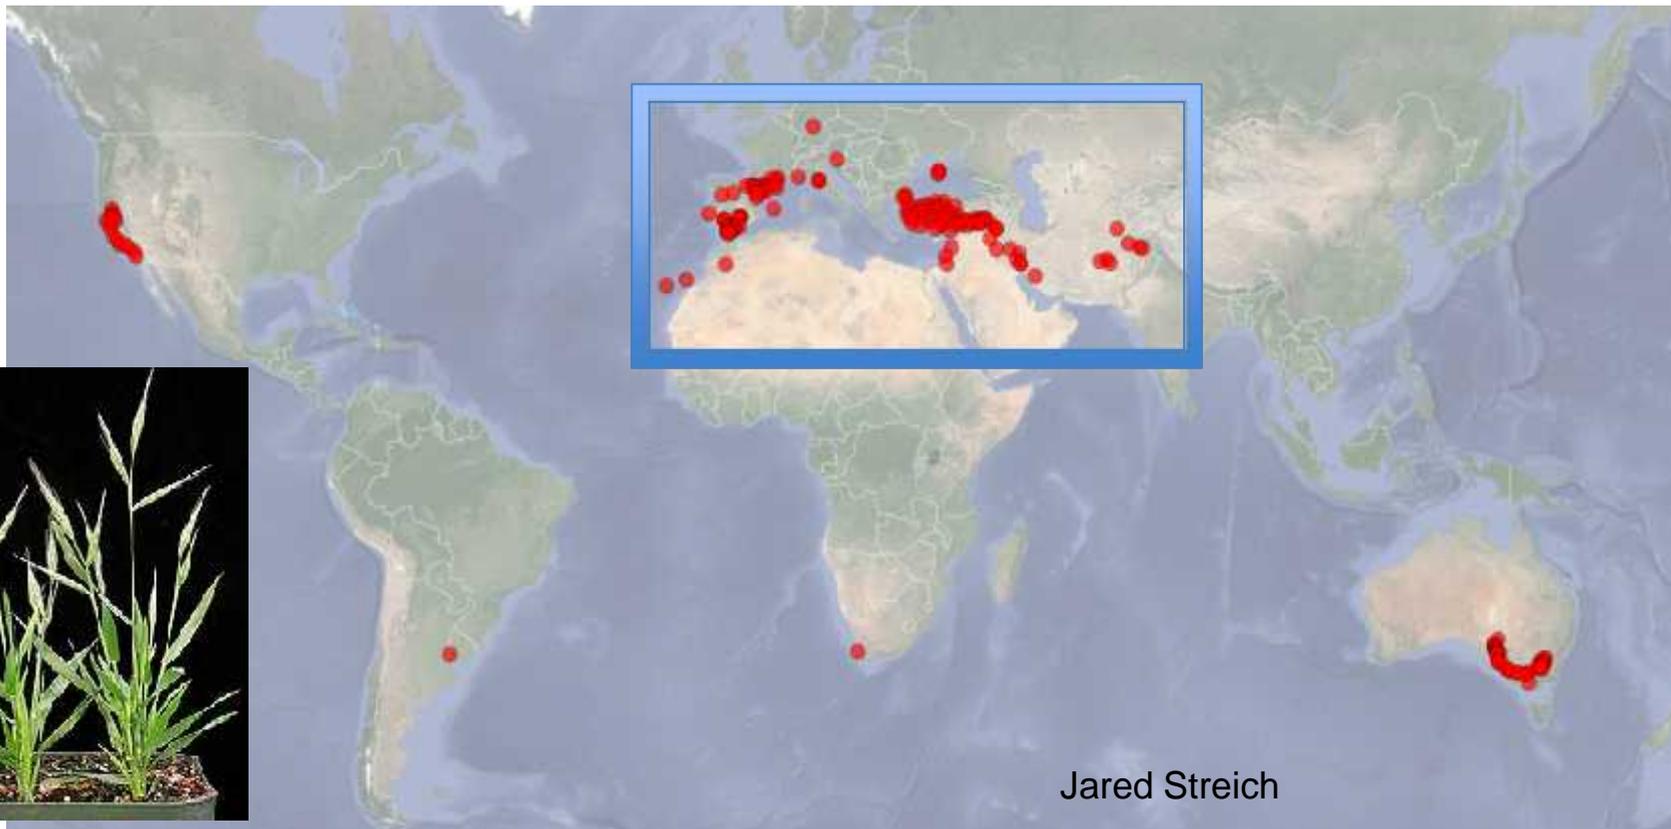

120 Private Collection: US accessions, Shuangshuang Liu via Kent Bradford

950 Borevitz Lab: 240 EU accessions, 660 Australian accessions, 48 North America acc.

400 Armenia, Israel, Lebanon, Greece, Private Collections, Ezrati Lab

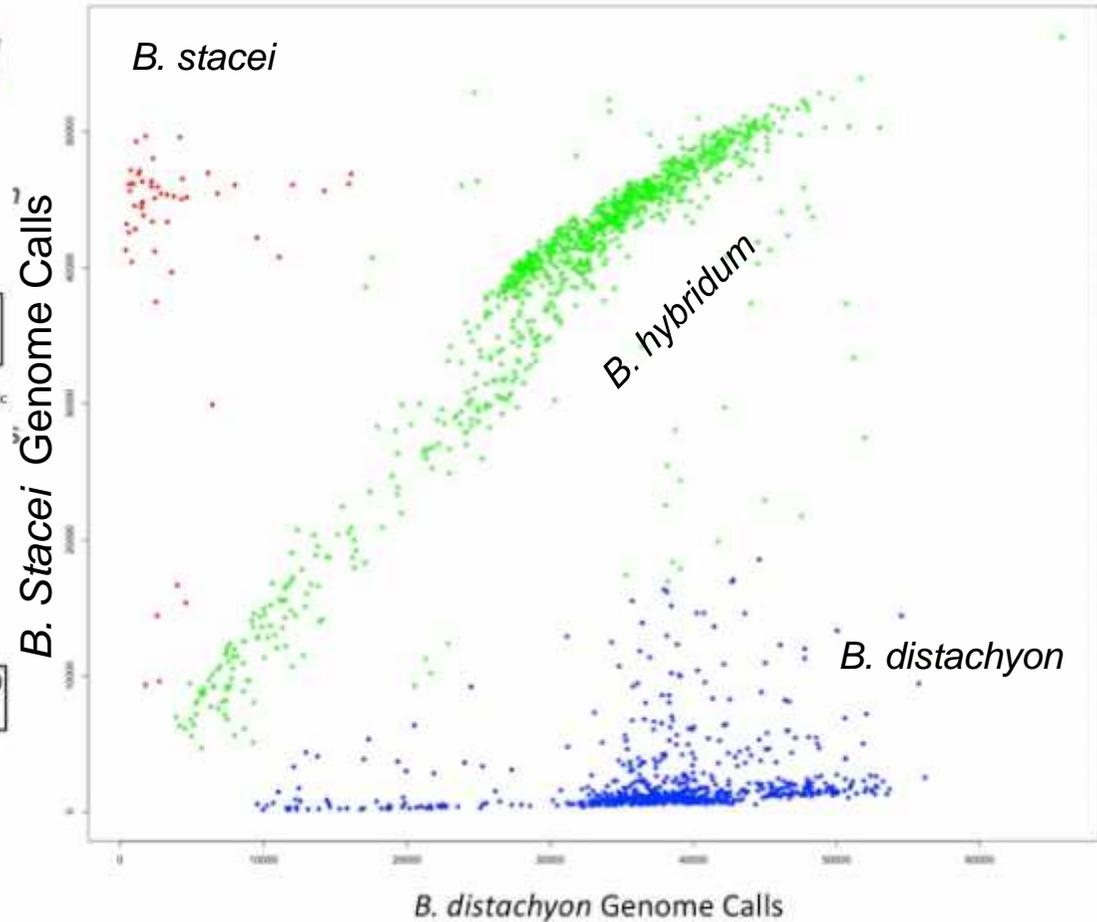

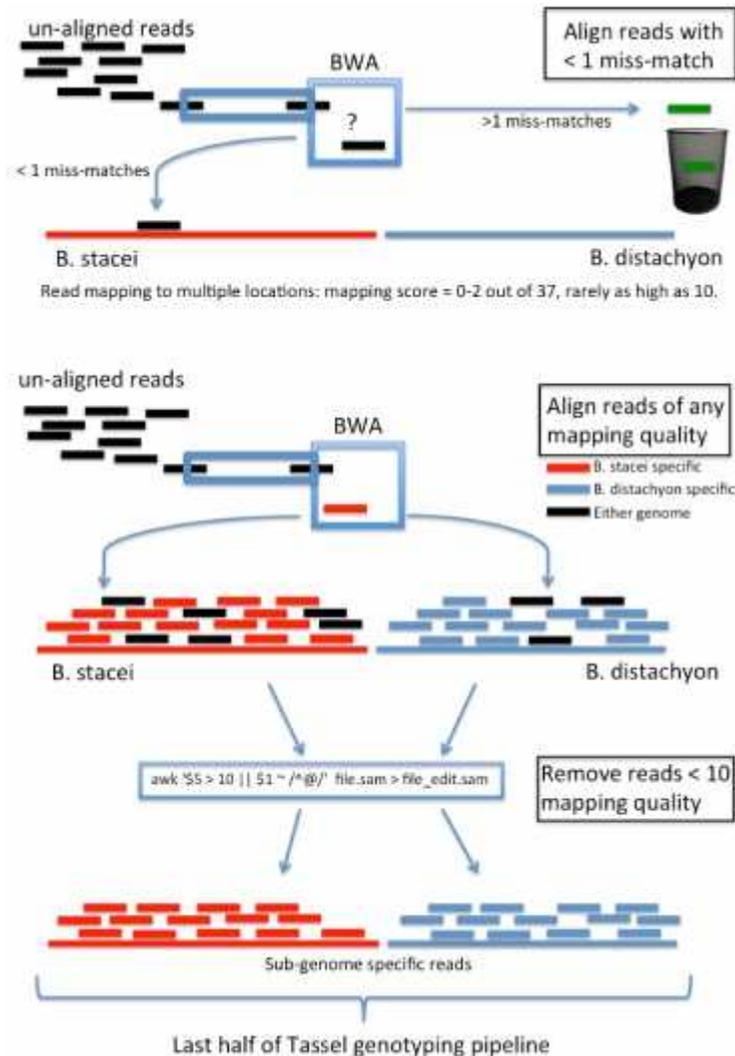

120 Private Collection: Turkey, Budak Lab

50 Private Collection: Italy, Greece, Georgia, Armenia, Spain, Hazen Lab

Jared Streich

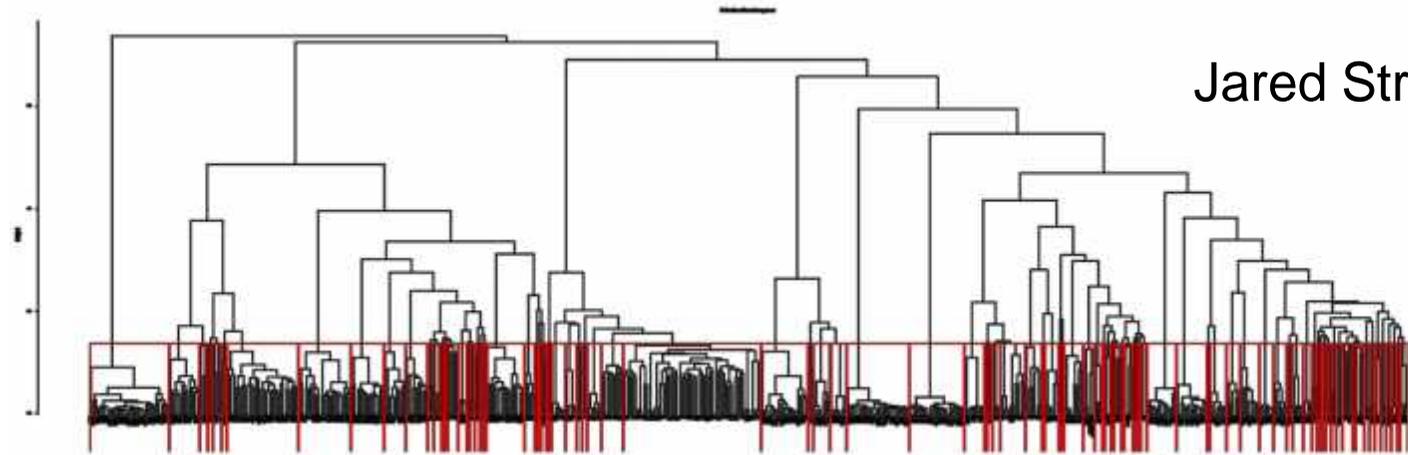

2 Diploid 1 Allotetraploid species

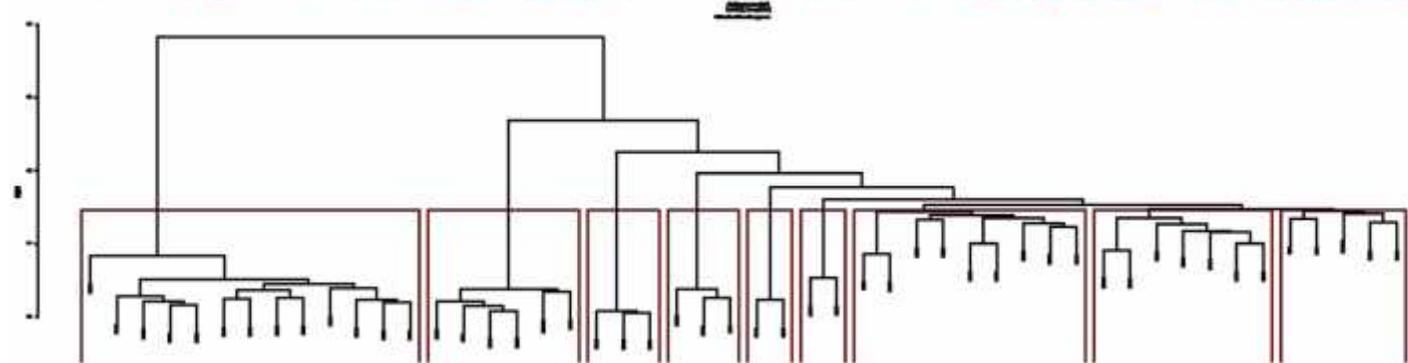

Summary - Species Diversity Sets

Jared Streich

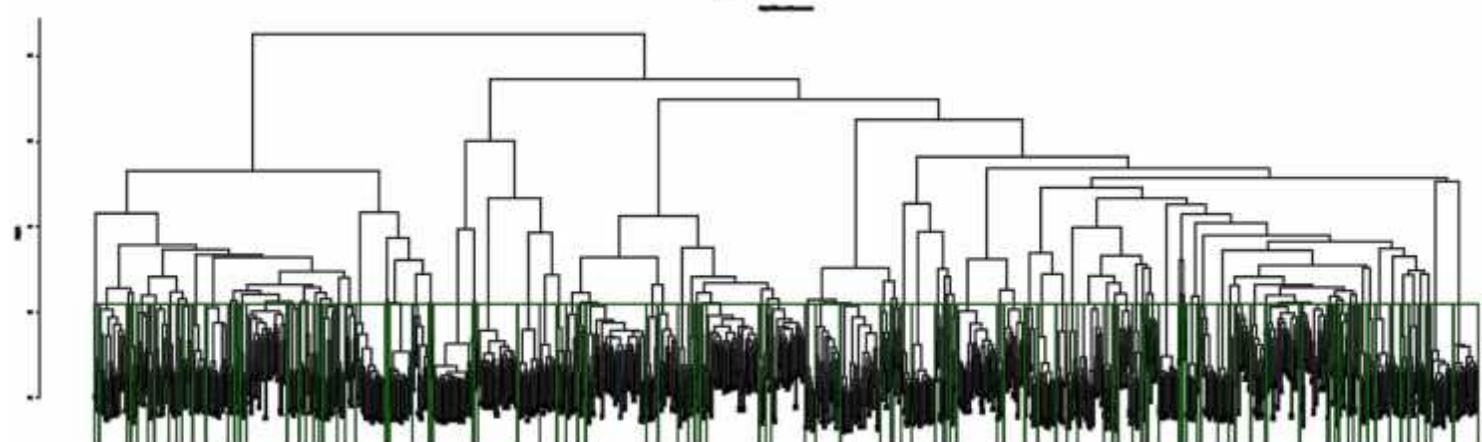

B. distachyon
 $n = 505$
130 genotypes
33,201 SNPs

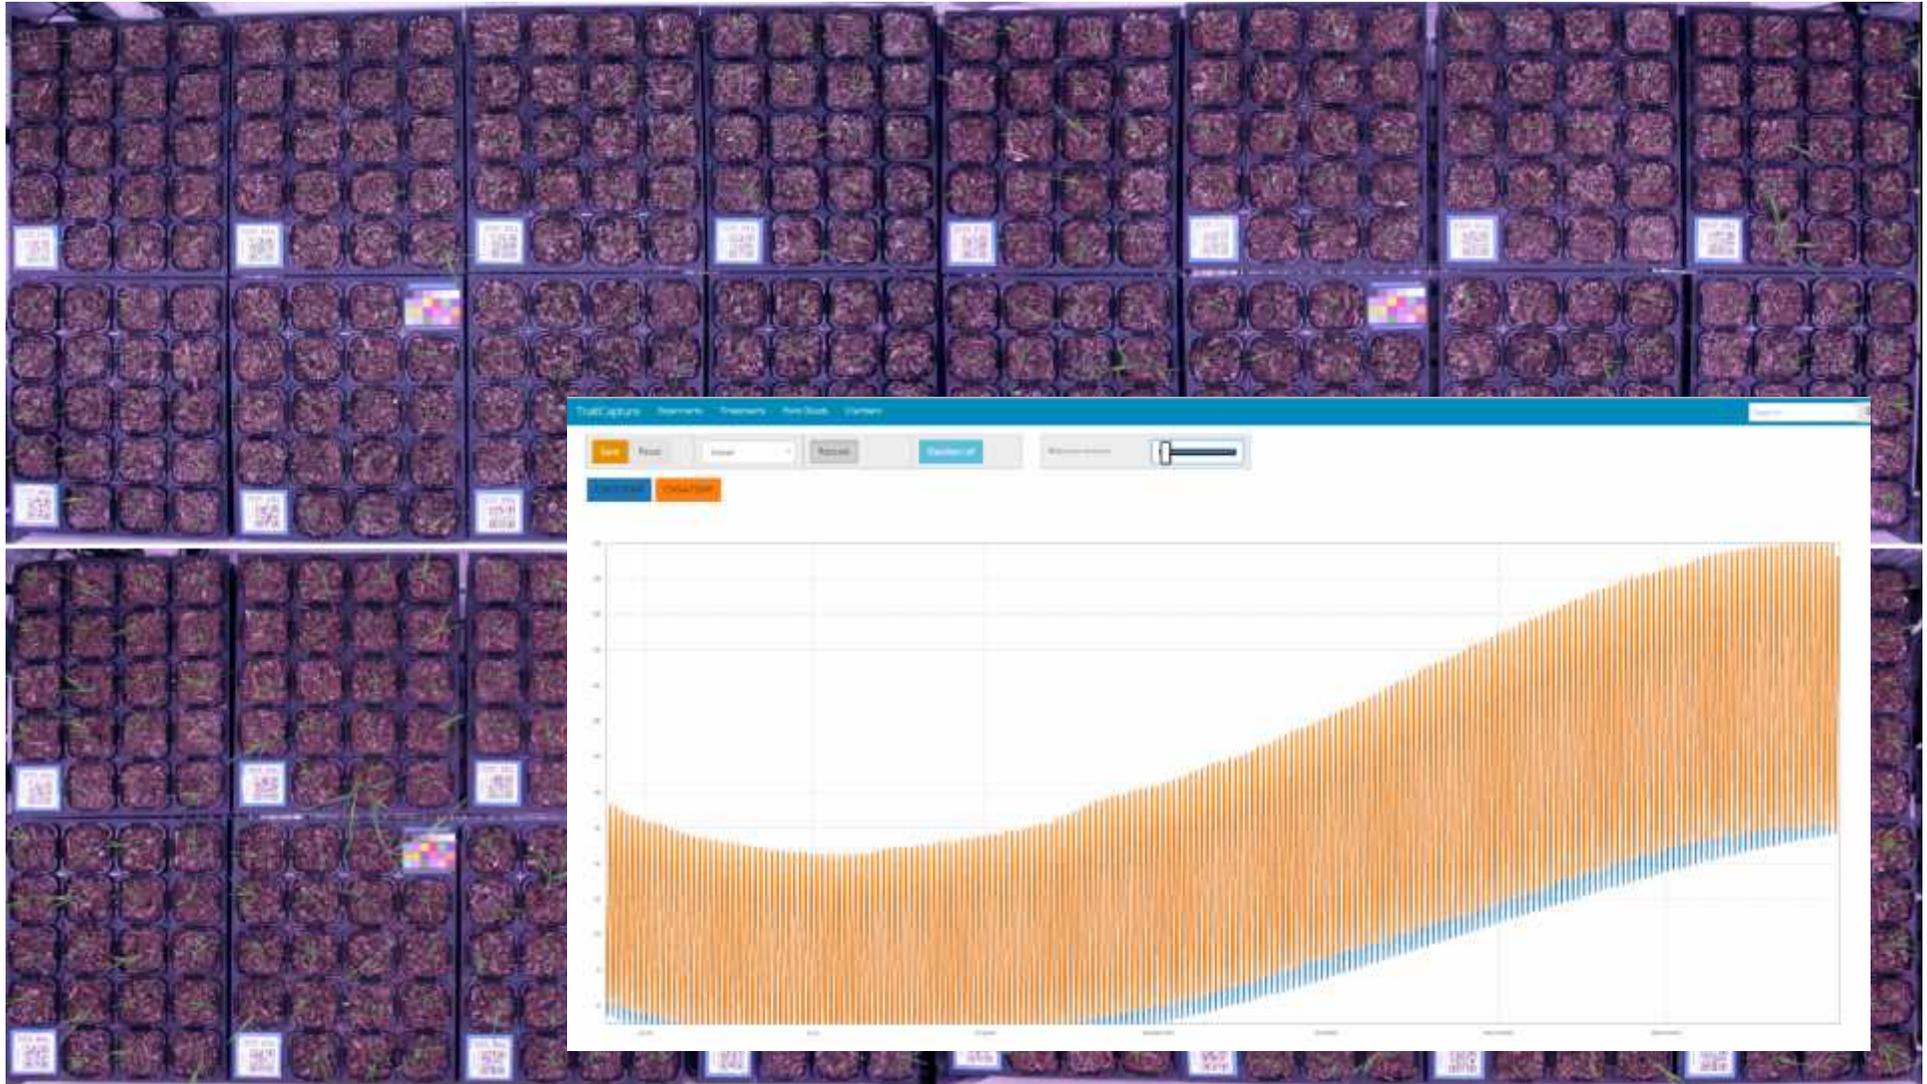

B. stacei
 $n = 51$
10 genotypes
21,058 SNPs

B. hybridum
 $n = 1,015$
80 genotypes
37,774 variants

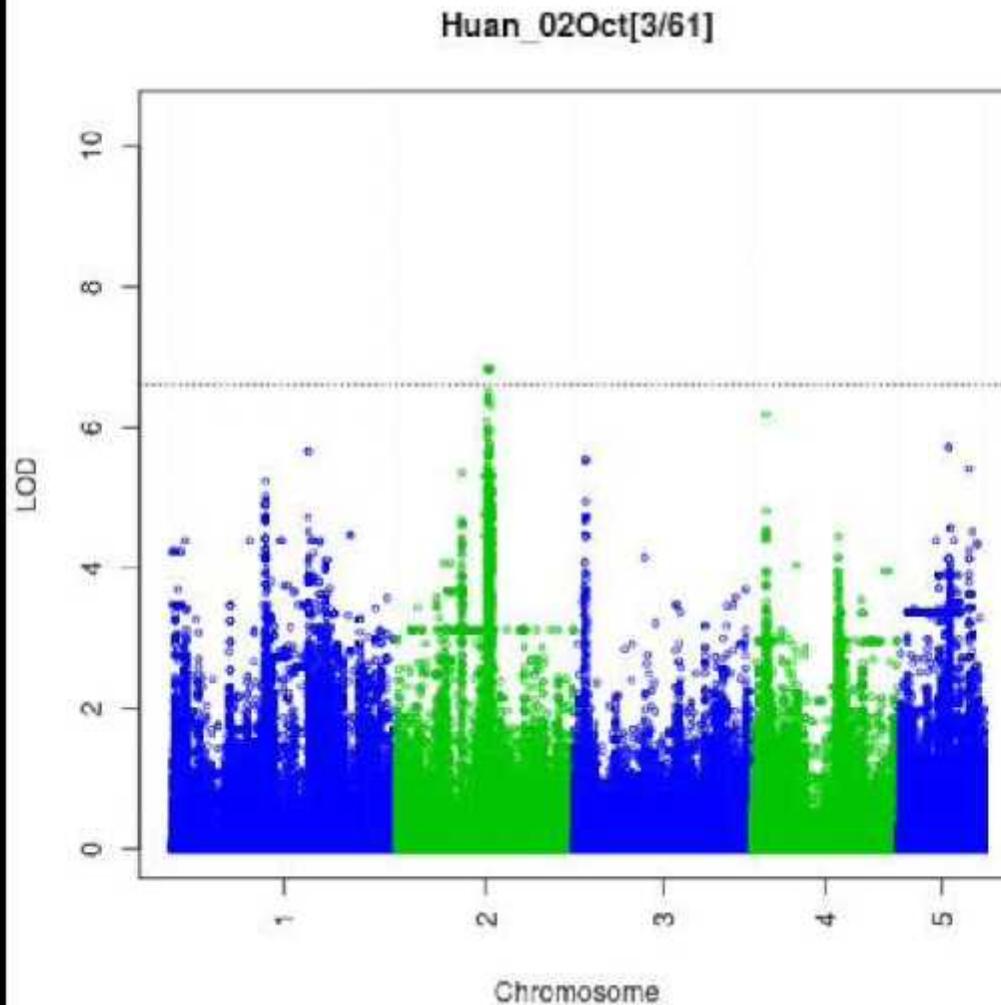

Brachypodium Wagawaga (2015 vs 2050)

The background of the slide is a photograph of a forest with tall, thin trees and a dirt road. A red truck is visible on the road in the middle ground. The text is overlaid on semi-transparent green boxes.

Spectranomics

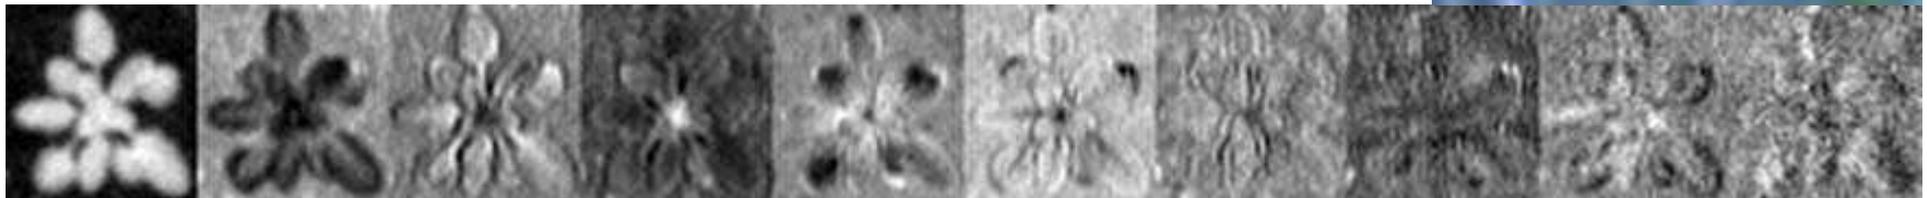

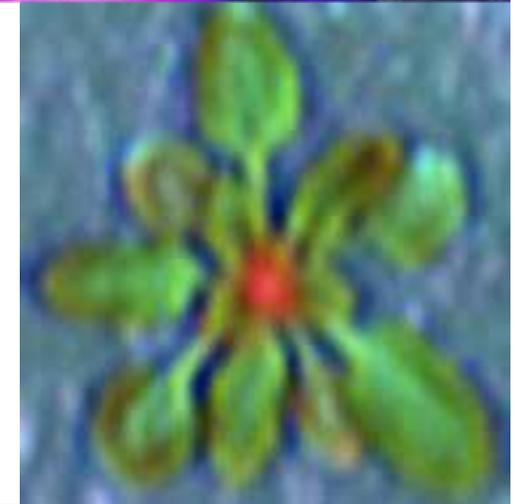

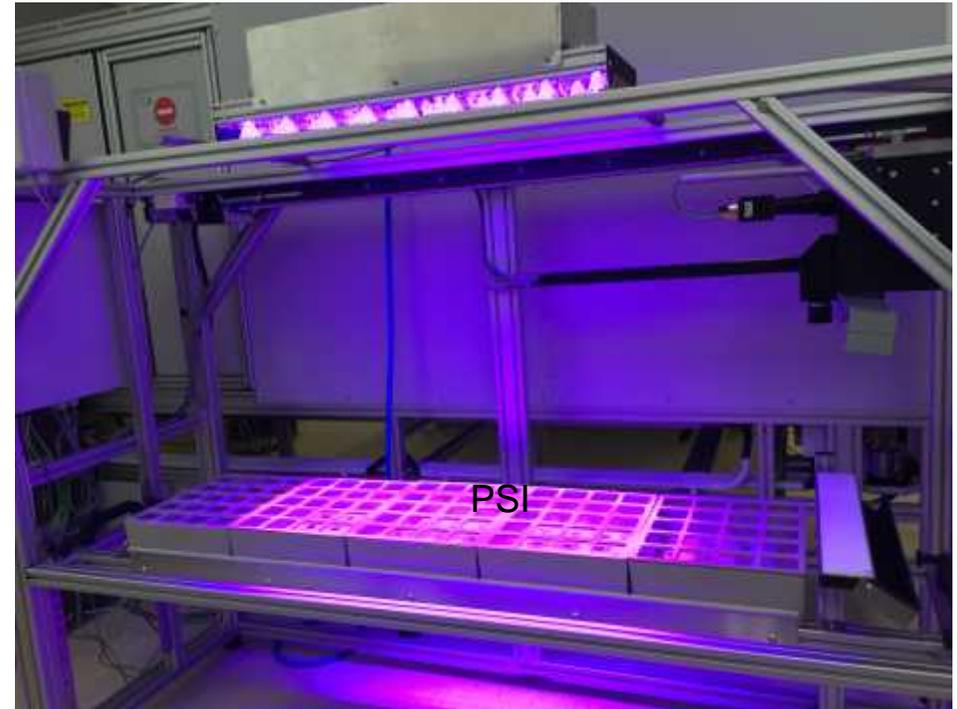

- What is this?

- Spectra is the 5th dimension.
- Chemical spectral fingerprinting
- Physiology based spectral index

- Evans, Furbank, **Alexander Ivakov**

- What do you do with this information?

- Crop & Genetic Models -> Predictions
 - Yield (biomass, grain)
 - Water and Nutrient Use Efficiency
 - Life Support Services

Prediction and Selection

- Population structure and kinship - random
 - Depends on sample and trait
- SNPs - fixed
 - 10s of large effect (1% var explained) = 10%
 - 100s medium (0.1%) = ~10%
 - 1000s small (0.01%) = ~10%
- Experimental Scale
 - 1000s sample @ \$10s = >\$10k
 - 100s samples @ \$100s

B. distachyon

- Significant amount of Biodiversity in both the Iberian Peninsula and Turkey
- Australia has two *B. distachyon* diploids, one East Med. One West. Med. One originating in Turkey BdTR13_ genotype, the other being a Pyrenees ABR like line.
